# README

How to use the application

1. When you have opened the project -> Open a new terminal.

2. In the terminal type "cd smidig" to open the frontend folder.
Run the command "npm install" to download the dependencies for the project.

3. Next, type the command "npm run start". This will start the frontend website.

4. Split, or open a new terminal and type the following commands.
    First "cd smidigAPI" to open the backend folder.
    Then "dotnet run" to start the backend server.

5. Now you can go back to the website, everything is set up and functional.
